

BrainStorm Support

Customer Success Team

Always here for you.

Welcome to BrainStorm Support

Customer Success Team

It is more than support.

A dedicated team that can jump on calls, go on-site, and spend time on complex problems.

Our customer success team is committed to the success of your business, developing long-term strategies in line with your business goals and dreams, whilst delivering the best possible customer experience.

With deep technical knowledge in ERP's & end-to-end manufacturing, automotive aftermarket, and distribution technology solutions from configuring products to delivering them to your customers' door, we cover every piece of technology your company uses along the way.

Delivering on success

We have a team who do a whole lot more than just be on call when things are broken. We're committed to ensuring every engagement with our clients' is a positive one, with high-quality service, reliable delivery, and clear communication.

We value your time, that is why we have developed and continually redefine our processes to focus on efficiency and getting the right solution to you faster. Using customer metrics we are able to help uncover emerging trends and opportunities to enhance your products and improve your customer experience.

Providing leading levels of industry support is at the forefront of every day for our customer success team. We keep your applications up to date and fully optimised, enabling you confidence in having your business running smoothly and without interruption.

The future of your business is just as important, actually we like to think of ourselves as partners in your success. We derive great value from helping our customers achieve their best.

Joining support gives you access to our Customer Success team, an even higher level of engagement with our account managers. Providing thought leadership and direction during business critical 'where to from here' discussions. As well as keeping you informed about functionality enhancements in upcoming version upgrades and reviewing any ongoing or unresolved issues.

We focus on giving you value, and exceeding your expectations.

Help is one click or call away

Priority Levels & Response Times

Below is a list of ticket severities levels with a proposed response time SLA during business hours:

5 - Low

Effecting a single user or group of users periodically for a single site
5 Business day response

4 - Normal

Effecting a single user, stopping them from performing a job for a single site
2 Business day response

3 - High

Branch or department outage affecting secondary system for a single site
4 Hours response

2 - Urgent

Branch or department outage affecting core business-impacting production, selling and shipping for a single site
2 Hours response

1 - Production Down

Company-wide outage affecting the entire user base
30 Minute response

Response time is defined as the time taken for a BSS resource to make contact and commence an assessment of the issue.

Our Customer Success Team

Our people, are knowledgeable, curious, visionaries, and have you at the centre of their world.

Customer Support

Our customer support coordinators are key to making the day-to-day running of our team as efficient and effective as possible.

Account Managers

Dedicated to ensuring that you and your business succeeds. They are the ones driving and ensuring you have your issues, projects, implementations and more delivered on time.

Discount from our at the time after-hours rate for; Weekends, National Public Holidays, Shutdown Periods

Monitoring

Proactive monitoring will allow us to address issues before they cause staff downtime.

Monitoring will run 24/7 with failures and/or outages being ticketed and reported via email. Example Probes:

- Enterprise software services are running
- SQL Database Monitoring Database Deadlock monitoring
- Query Performance monitoring
- Long running query monitors

Dedicated Customer Success Manager

Dedicated resource working with you actively on your account to ensure your team are gaining the maximum value from your enterprise software.

Database Backup Monitoring & Testing Daily monitoring of the backups and quarterly restore testing

Copied of Databases from Production to Pilot/Test environments

Up to four times a year BSS will update pilot environments with a fresh copy of the production database. Significantly reducing the chances of differences occurring between testing and production. This includes up to a maximum of 3 different production databases

Database Optimisation

Databases need regular maintenance to ensure they are performing well. BSS will setup and maintain processes to run your system optimised and performing well. Activities included in this process:

- Archive and purge of backup/staging tables
- Setup needed indexes and also identify and clean up large & unused indexes
- Slow/Long running query analysis and optimisation
- DB size/growth monitoring

Call us at anytime between 8.30am - 5pm (excluding National holidays)
